

## § 10.501

## 20 CFR Ch. I (4–1–15 Edition)

the wages earned before the work-related injury if the evidence establishes that the employing agency had offered, in accordance with OWCP procedures, a temporary light duty assignment within the employee's work restrictions. (The penalty provision of 5 U.S.C. 8106(c)(2) will not be imposed on such assignments under this paragraph.)

(b) Each disabled employee is obligated to perform such work as he or she can. OWCP's goal is to return each disabled employee to work as soon as he or she is medically able. In determining what work qualifies under 5 U.S.C. 8115 for determining the wage-earning capacity for a particular disabled employee, OWCP considers all relevant factors, including the employee's current physical limitations, whether the work is available within the employee's demonstrated commuting area and the employee's qualifications to perform such work.

(c) A disabled employee who refuses to seek or accept suitable employment within the meaning of 5 U.S.C. 8106(c)(2) is not entitled to compensation.

(d) Payment of medical benefits is available for all treatment necessary due to a work-related medical condition.

### **§ 10.501 What medical evidence is necessary to support continuing receipt of compensation benefits?**

(a) The employee is responsible for providing sufficient medical evidence to justify payment of any compensation sought.

(1) To support payment of continuing compensation where an employee has been found entitled to periodic benefits, narrative medical evidence must be submitted whenever OWCP requests it but ordinarily not less than once a year and with any filing of a form CA-1032. It must contain a physician's rationalized opinion as to whether the specific period of alleged disability is causally related to the employee's accepted injury or illness.

(2) For those employees with more serious conditions not likely to improve and for employees over the age of 65, OWCP may require less frequent documentation, but ordinarily not less than once every three years.

(3) The physician's opinion must be based on the facts of the case and the complete medical background of the employee, must be one of reasonable medical certainty and must include objective findings in support of its conclusions. Subjective complaints of pain are not sufficient, in and of themselves, to support payment of continuing compensation. Likewise, medical limitations based solely on the fear of a possible future injury are also not sufficient to support payment of continuing compensation. See § 10.330 for a fuller discussion of medical evidence.

(b) OWCP may require any kind of non-invasive testing to determine the employee's functional capacity. Failure to undergo such testing will result in a suspension of benefits. In addition, OWCP may direct the employee to undergo a second opinion or referee examination in any case it deems appropriate (see §§ 10.320 and 10.321).

### **§ 10.502 How does OWCP evaluate evidence in support of continuing receipt of compensation benefits?**

In considering the medical and factual evidence, OWCP will weigh the probative value of the attending physician's report, any second opinion physician's report, any other medical reports, or any other evidence in the file. If OWCP determines that the medical evidence supporting one conclusion is more consistent, logical, and well-reasoned than evidence supporting a contrary conclusion, OWCP will use the conclusion that is supported by the weight of the medical evidence as the basis for awarding or denying further benefits. If medical reports that are equally well-reasoned support inconsistent determinations of an issue under consideration, OWCP will direct the employee to undergo a third, impartial referee examination to resolve the issue, which will be given special weight in determining the issue.

### **§ 10.503 Under what circumstances may OWCP reduce or terminate compensation benefits?**

Once OWCP has advised the employee that it has accepted a claim and has either approved continuation of pay or paid medical benefits or compensation,
